ER

MEMORANDUM FOR THE PRESIDENT

In view of the possible resumption of Soviet nuclear tests at any time, I have asked the members of the United States Intelligence Board to alert all appropriate facilities so as to obtain the most complete information possible whenever such tests occur.

I have also cautioned the Board members to take all feasible steps to prevent the unauthorized disclosure of intelligence information regarding any Soviet nuclear tests, in order to provide essential ILLEGIB protection of the intelligence sources and methods used in obtaining this information. Controls on the dissemination of information regarding foreign nuclear explosions are established by a Directive of Central Intelligence Directive No. 1/6 (copy attached). This directive specifically provides that no public release of information relating to the occurrence of foreign nuclear weapons tests will be made, except as directed by the President or the National Security Council.

In view of the great importance of safeguarding intelligence sources and methods used in detecting such foreign nuclear tests, however, I recommend with the concurrence of the United States Intelligence Board that you issue a Presidential directive reaffirming that no public release of information relating to the occurrence of foreign nuclear weapons tests will be made except as specified in pages 1 thru 3 authorized by the President. A suggested draft is attached.

DRAFT PRESIDENTIAL DIRECTIVE

In view of the possible resumption of Soviet nuclear tests at any time, I caution all recipients of classified intelligence information regarding such tests to take all feasible steps to prevent its unauthorized disclosure. Such action is essential to safeguard intelligence sources and methods used in obtaining this information.

I also hereby reaffirm existing directives that no public release of information relating to the occurrence of foreign nuclear weapons tests will be made except as specifically authorized by the President.
